

FARZAD HAYAT

hello@farzadhayat.dev | linkedin.com/in/farzadhayat | farzadhayat.dev

NZ Citizen | Available for contract, casual, or freelance work

CAREER SUMMARY

Recent Computer Science graduate from QUT with Distinction (6.67 GPA) with hands-on experience shipping production features at Tanda, building cloud infrastructure on AWS with Terraform and Docker, and 15 months of QA engineering at Tiny Technologies. Currently building Danzeira, a dance event management platform, while seeking contract, casual, or short-term IT and engineering roles.

EXPERIENCE

Founder

February 2026 – Present

Danzeira

Brisbane, Australia

- Sole developer and founder — architecting and shipping a full-stack Rails application end-to-end, from PostgreSQL schema design and Stripe payment integration to Heroku deployment and ongoing product decisions.
- Built domain-specific features including leader/follower role balancing, QR code check-in, push notifications, and iCalendar sync; implemented an organiser onboarding and vetting workflow.

Software Engineering Intern

December 2025 – January 2026

Tanda

Brisbane, Australia

- Shipped the Compliance Document Library to production on Tanda's Ruby on Rails platform — a feature serving 10,000+ businesses to securely store, manage, and track critical compliance documents.
- Architected the PostgreSQL schema and automated email notification system for document expiry and required actions, ensuring quality through comprehensive Minitest tests and peer reviews in a two-person team.

Quality Assurance Engineer

December 2023 – February 2025

Tiny Technologies, TinyMCE

Brisbane, Australia

- Ensured stability for TinyMCE (2M+ monthly downloads) via comprehensive end-to-end, smoke, and exploratory testing across 23 releases.
- Executed cross-browser (Chrome, Firefox, Safari) and cross-platform (Web, Android, iOS) testing using LambdaTest and internal tooling.
- Produced technical documentation using Antora, managed test cases and bug tracking using Jira, TestRail, and GitHub, and contributed to release planning and quality gates.

Freelance IT Consultant

September 2023 – Present

Self-employed

Remote

- Built and deployed WordPress and cloud-hosted Windows Server infrastructure for Medics Online, a telehealth startup, supporting 800+ monthly patient appointment bookings from the company's inception.
- Configured server hosting, email infrastructure, DNS, and SEO to ensure reliable performance, security, and discoverability.

EDUCATION

Queensland University of Technology

July 2021 – June 2026

Bachelor of Information Technology (with Distinction), Computer Science major

Brisbane, Australia

- 6.67 / 7.00 GPA; Recipient of 3x QUT Executive Dean's Commendation for Academic Excellence.
- Interests: Cloud Computing, Systems Programming, Cyber Security, Machine Learning, Blockchain Technology.
- Activities: College of Excellence, QUT Entrepreneurship, Code Network, QUT AI & ML, UQCS, and UQ Dance.
- Transferred from the University of Canterbury (Bachelor of Computer Science) in 2023.

PROJECTS

AI E2E Test-Bench <i>Python, Playwright, Harbor, Docker, LLM Agents, QA Automation</i>	2026
• Built a prototype VS Code extension leveraging the Jira MCP server to automatically extract user stories, generate comprehensive test cases, and post them directly back to Jira. • Evaluated the performance of AI agents (Claude Code and a team-built CLI tool) in generating Playwright E2E tests across a 10-task benchmark dataset on the Harbor framework. • Designed a multi-metric reward model assessing functional correctness, DRY code quality, POM usage, flakiness, and mutation score (Stryker) for precise AI evaluation.	
Cloud Media Transcriber <i>AWS, Docker, Terraform, Node.js, Express, Postman, MongoDB, TensorFlow, Linux</i>	2024
• Architected a scalable media transcription pipeline using FFmpeg and Whisper ASR, orchestrating microservices via ECS/Lambda with an Express REST API behind an Nginx reverse proxy on EC2. • Managed infrastructure-as-code with Terraform across 10+ AWS services (S3, SQS, Cognito, ElastiCache, CloudWatch) and stored transcription records in DocumentDB.	

CERTIFICATIONS

AWS Certified Cloud Practitioner: July 2025 – July 2028

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, Ruby, SQL, Solidity, C, C#, Bash, Dart, Racket
Frameworks & Libraries: React, Node.js, Express, FastAPI, Ruby on Rails, Flask, Hardhat, Playwright, Flutter, Tailwind CSS
Cloud & Databases: AWS (EC2, S3, ECS, Lambda), Docker, Terraform, PostgreSQL, MongoDB
Tools & Methodologies: Linux, Git, GitHub Actions, Jira, TestRail, LambdaTest, CI/CD, Claude Code
